

SeprimA Camargue

COLOUR

The colour is grey-yellow

Product description

The bricks are formed individually in sanded and unsanded moulds to a solid mass, pressed from clay of alluvial origin from an area located in the Scheldt basin and fired in a tunnel oven at a temperature of approximately 1180°C. On the narrow side the bricks have a sanded and unsanded surface structure. The shape is slightly irregular. Finally the bricks are processed until they have acquired a weathered shape, due to which the paver surface leaves a rustic, aged impression.

TECHNICAL CHARACTERISTICS

The paving is laid in fired clay bricks of Belgian origin, quality class A, carrying the CE and UKCA mark.

CE label according to EN 1344 : 2013 / AC : 2015

Manufacturing dimensions (L x W x H) : *218x52x72 mm
Quantity / m² with a traditional joint : ca. 85

PHYSICAL AND MECHANICAL PROPERTIES ACCORDING TO EN 1344: 2013 / AC: 2015

| Aspect | Class | Mean | Individual |
|----------------------------|-------|-------------------------|-------------------------|
| Water absorption NBN EN771 | W3 | Max 3% | Max 4% |
| Transverse breaking load | T4 | Min 80 N/mm | Min 64 N/mm |
| Abrasion resistance | A3 | Max 450 mm ³ | Max 500 mm ³ |
| Frost resistance | FP100 | freeze/thaw resistant | freeze/thaw resistant |
| Wet skid resistance | U3 | >55 | |
| Acid resistance | C | < 7% | |
| Size tolerance* | R1 | Max. ± 0,4 √d | Max. 0,6 √d |
